SUMMARY

Computer Engineering student interested in Data Science, Machine Learning, and Web Development. Experienced in building projects such as an automated resume screening system and a Blockchain-based inventory platform. Seeking an internship opportunity to apply data analysis, machine learning, and web development skills in real-world projects.

PROJECTS

Decentralized Inventory Management System **May 2025 - Present**

- Developing a full-stack blockchain inventory system using React, Typescript, Node.js, Solidity, Ganache, and MetaMask.
- Tracks inventory flow from manufacturer, supplier, distributor, retailer to sold product.
- Aims to provide transparent records and plans to add transaction analysis graphs for insights.

Automated Resume Screening System **Nov 2024 - Feb 2025**

- Developed a system using BERT to semantically match resumes with job descriptions, achieving 85% matching accuracy.
- Processes 100+ resumes simultaneously and ranks candidates based on similarity scores.
- Built a UI for ranking and filtering candidates, automating the resume evaluation process.

SKILLS

Programming Language: Python ,C++ ,C

ML and AI: Machine Learning ,BERT,NLP

Data: Pandas ,Numply ,Matplotlib

Databases: MySQL ,PHPMYAdmin

Tools: Git ,Github ,VS code

EDUCATION

Bachelor of Computer Engineering **Jun 2022 - Aug 2026**

Advanced College of Engineering

Relevant coursework in Artificial intelligence, Data structure, Database system Computer Organization and Architecture

CERTIFICATION / TRAINING

Web Design Course

Completed a Web Design course covering HTML, CSS, basic JavaScript, and responsive website design for modern web applications.

ADDITIONAL INFORMATION

Language: English, Nepali

Soft Skills: Team Work, Adaptability, Problem Solving

Extra Tools: Google Colab, Excel
